Slim Cat6E Patch Cable 2'
Blue (10 Pack)

CAT6S-2-BL

SKU: 184737 UPC: 81993201416

When it comes to patch cables, the ProConnect Slim Cat6E series stands out from the crowd. These cables feature an ultra-slim jacket and wire section, giving your installations a clean and professional look. But what sets these cables apart is the innovative plastic connector, designed for convenience and durability.

The most striking feature of these patch cables is their incredibly slim profile. The thin cable section reduces visual clutter and keeps your installations looking sleek and tidy. Removing the cable is a breeze thanks to the longer release tab. It's designed for easy grabbing, especially in crowded racks, making it a superior choice compared to cheaper rubber connectors that tend to bend when pressed. Crafted for professional installations, these cables are made with Stranded Unshielded Twisted Pair (UTP) and feature clear RJ45 ends. This ensures reliable performance and a clean, polished look in your setups.
